

EVOTEC[®]

CALCIUM-CALCIUM
MAINTENANCE FREE

BRAND BROCHURE

www.evotec-batteries.gr

A true all round performer

“ Ca+/Ca-, 100% maintenance free technology batteries, Evotec are available for European (DIN), Japanese (JIS) and Heavy Duty vehicles.

Battery Structure

Ca-Ca
Expanded Metal
Technology

Microporous
Separator

High Efficiency
Active Material,
designed to perform
High Value of CCA

Safe central
degassing system
with 4-chamber
leakage protection system

[DIN STANDARDS]

Unscrewable plugs
with integrated
O-ring for perfect
leakage
protection

Welded backfire system
with integrated
flash arrestor

Central degassing system
and deflectors for separation
of acid fumes for Increased
safety against leakage
and self-discharge

Flash arrestors integrated
in the double lid
for left and right exit

Charge
Indicator

[JIS STANDARDS]

Extensive & Versatile
product, covers today's
premium and middle end
car parc, providing **durable**
and reliable power in all
performance criteria

Available Ranges

Enhanced Range - AGM & EFB Battery Lines

Battery range developed to meet the increased demands of latest generation vehicles, especially those with Start & Stop function. Evotec AGM battery is the ideal solution for vehicles with advanced Start & Stop technology. Special advanced glass mat separators provide significant improvement in all performance criteria including cycling ability, charge acceptance, and cranking power. Evotec EFB battery is perfectly suitable for the latest generation vehicles with entry level Start & Stop function, offering superior durability in intense driving conditions and reliable power. Additionally, Evotec EFB batteries are the ideal alternative for cars without a start-stop system, as they provide significant performance advantages and extended service life over conventional batteries.

All Rounder Range - Commander & Master Battery Lines

A wide battery range, developed to meet the cranking requirements of the majority of vehicles on the road today. Designed to cover the increased power needs of today's high-end car parc, Evotec Commander is a selective battery line. Evotec Commander batteries deliver the cold-start performance and the superior power which is needed to meet the high load of electrical requirements of the latest generation of premium cars. Extensive and versatile, Evotec Master line covers most of today's standard and middle-end car parc. Designed to provide durable and reliable power in all performance criteria, Evotec Master is a true all-round performer. Evotec Master batteries deliver a balanced approach between cranking and longevity for the vast majority of vehicles with standard electrical loads.

Enhanced Technology Range - Heavy Duty EFB

Battery range developed to meet the increased demands of latest generation of Heavy Duty vehicles. Utilizing latest technology, EFB Truck batteries (Ca+/Ca- sealed MF), are designed to meet the increased "Hotel Facility" power requirements of modern trucks, demonstrating outstanding durability to recurring charging cycles, as well as significant resistance to vibration.

All Rounder Range - Master & Conventional Heavy Duty

Battery range suitable for most modern trucks with common electrical demands. Evotec Master Heavy batteries, Ca+/Ca- sealed or standard MF, are the appropriate choice for much of the modern fleet of trucks on the road today, which have common electric facilities, but high demand for power and longevity. Evotec Conventional Heavy Duty are designed for most applications, Conventional HD batteries ensure proper power and satisfactory service life, in various operating conditions.
